

## About AVCO

The Audio Visual Company (AVCO) is a systems integration company that specializes in the design, installation, and maintenance of AV/IT solutions. Our projects range from simple to complex AV presentation and video collaboration systems. Established in 1970, AVCO has a long history of designing and installing secure signal routing, video displays, specialized audio systems, and touch panel control. These systems enhance the capabilities of DoD meeting and presentation rooms, secure military briefing facilities, command & control centers, video conference rooms, and secure training rooms.

AVCO is located in a 20,000 sq. ft. facility in Aiea, HI. This complex includes an AV Technology Center, Sales Department, Design and Engineering Department, Service Center and shipping department. Clients meet with AVCO sales staff to discuss their AV requirements and can then evaluate these solutions in our AV Technology Center

AVCO provides service support for the equipment we integrate and install. Our Aiea Service Center can dispatch a technician for an onsite trouble call or clients can bring their equipment in for service repair. From the initial design, to installation, to service and support, AVCO delivers a premium experience for our clients.
